VISION

Dwarka International School endeavours to empower students with decision making, reflection, self-assessment, foresight and 'learning by doing' thus enabling them to attain an enriching educational experience. The school builds not only conscientious pupils and diligent students but also global citizens, empathetic persons and tolerant individuals, one who understands the needs of peers as well as co-citizens and respects diversity and opinion of others. The school envisages a society comprising strong academic personalities, eminent sports persons, good orators, talented actors, melodious singers, poised dancers, skilled educators, true leaders for which it exposes the students to a plethora of activities and gives them the platform to discover themselves and decide their goals. Thus the vision of the school is to instill self confidence and direction into each student and also to infuse in him/her twenty first century skills to make them adept learners throughout their lifetimes.

MISSION

Dwarka International School strives to nurture its pupils with love, care and affection. The school in its attempt to chisel their innate skills provides them a platform to perform and excel. It instills in the students essential skills as critical thinking, leadership, problem solving, effective communication, time management and team coordination with giving due respect to values as compassion, honesty, empathy and forgiveness. The school believes in experiential education "Learning by Doing" wherein the child is engaged actively in the learning process. The role of educators in the school is to facilitate learning, provide experiences and take care to expose themselves to the power of the students' ideas as well. Educators, rather than being purveyors of knowledge, give students the chance to make meaning of the situation in a way that they need. Education in the school is accomplished not only within the classroom but also beyond the precincts of the classroom, hence abiding by the philosophy of "Learning beyond Classroom" which is the school motto. Nature walk, heritage walk, visits to significant places, enables the students to explore the world outside the classroom and help them to ponder and contemplate. Debate, declamation, role-play allow them to voice their opinion and encourage them to argue with valid points and firm conviction. Knowledge, therefore, through a series of experiences brings meaning to the skill and understanding and imparts a new dimension to learning.

The school has been instrumental in helping students to cope with performance pressure particularly during the pandemic. Regular counseling has helped the students to manage stress and anxiety and to adapt to the new format of learning i.e. virtual classes and at the same time enabled them to adjust to the real environment of the school as the school reopened for physical classes. The school caters to the physical, emotional and mental needs of the child and renders them endurance, strength and integrity of character, mental agility and physical fitness to sail through the journey of life and brave all odds and complexities.
